ATTENDANCE SYSTEM

overview

Daily attendance information for students and personnel can be entered and tracked in multiple ways as preferred by the user. A daily attendance list of absent, tardy, and dismissed students (with parent's name, address, and telephone number) is immediately available for printing. Attendance information can easily be updated allowing you to print full-day or period-by-period attendance lists.

Daily and class attendance may be maintained separately or configured so that one affects the other.

Daily attendance categories for students with class absences can be changed based on the number of cuts. The Notification feature keeps administrators current on attendance completions through the day.
