## DISCIPLINE SYSTEM

### overview

Track disciplinary infractions for each student and create useful reports based on those infractions. Generate data for safe school reporting. For any infraction the user can assign a suspension or detention, indicate the number of days or hours to be served and indicate the actual dates when the suspension/detention must be served. The administrator in charge of suspensions/detentions can display a list by date and indicate if the student has attended.

Customization is simple with user-defineable infractions, disciplinary measures, locations, and actions. Each infraction can be tagged with a property and a type allowing more detailed reporting.
