ELEMENTARY GRADE BOOK SYSTEM

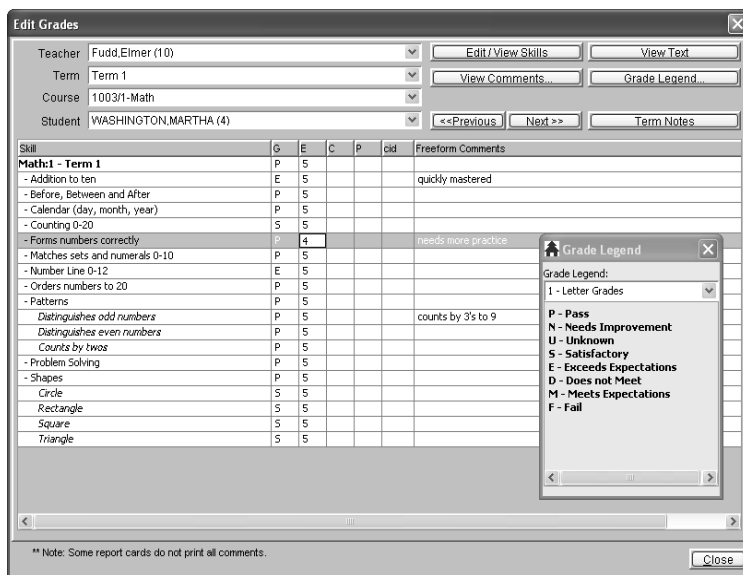

overview

This program allows teachers to create Report Cards for younger students that are more detailed and narrative than a traditional Report Card. Teachers can set up three level hierarchies indicating the subjects and skills being graded, for example, Math, Shapes, Recognizes Circles. A grade can be entered for each level as well as a comment. Grades are defined by the school and can be different for each grade level or group of students. In addition, teachers can enter effort, participation and conduct grades.

Report cards group all grades for one student into a single report and are printed on plain paper. Several report card styles are provided.

special features

- ❖ Grades are defined by the school
- ❖ Grade Legend and attendance prints on each student's report card
- ❖ Report cards can be printed for individual terms or all terms together
- ❖ Unlimited number of courses and skills on each report card
- ❖ Setup can be copied from one teacher to another
- ❖ Preset comments and/or freeform comments can be included
- ❖ Include your school logo on Report Cards
