HEALTH SYSTEM

overview

Track student health information using the Health System. Using demographic data from the core system, the school nurse is given a framework for entering an individual health record for each student. Student information is kept in a single location allowing the user to view and or print a student's entire health record.

Users will create custom lists of allergies, immunizations, medications, chronic conditions, and screenings. Emergency information and medical alerts are configurable, along with preferred physician information. Nurse office visit and daily care logs are easy to enter, and a wide variety of health reports are available.

Student Information - JOHN ADAMS #3

Student ID System ID: 5, First Name: JOHN, Middle Name: Q, Last Name: ADAMS, Suffix:

Miscellaneous: Sex: M, YOG: 2012, Grade: 11, Homeroom: 200, Active:

Medical Alert: Show Picture

General, Guardian(s), Categories, Attendance, Grades, Transcript, Progress, Schedule, Discipline, Health, GB Assignments, Standards

Immunizations, Screenings, Health Office Visits, Daily Care/Meds, View Text

Provide Treatment:
Call Ambulance:
Call Doctor:
Health Data Current: Health Notes
