

web2school

STUDENT/GUARDIAN LOGIN

overview

Web2school provides secure browser-based access for guardians and students to view grade and attendance information. A guardian logging into the program sees only those students to whom the guardian is linked. Students logging into the program can only see their own data.

Guardian access provides an additional method of communication between schools and guardians by giving them up to the minute information on their children. Student access provides information about assignments and daily grades extracted directly from teacher grade books.

special features

Course/Section	Teacher Name	Term Average	Assignment Type	Assignments	Date Assigned - Due	Score
